

# Payment Resolution Guide

NovaTech Solutions — Billing Operations

|            |                     |                |            |
|------------|---------------------|----------------|------------|
| Version    | v1.5                | Effective Date | 2025-02-15 |
| Department | Customer Operations | Last Review    | 2025-03-01 |

## 1. Purpose

This guide provides structured resolution paths for all payment-related issues encountered by NovaTech customers. Support agents and customers can use this guide to identify the correct resolution workflow for their specific situation.

## 2. Common Payment Issues & Resolutions

### 2.1 Duplicate Charge

A duplicate charge occurs when a customer is billed more than once for the same transaction.

- **Verify:** Check the billing statement for two identical amounts on the same date.
- **Resolution:** Submit a refund request via portal with both transaction IDs.
- **Timeline:** Duplicate charges are resolved within 1–2 business days.
- **Prevention:** NovaTech's payment gateway has idempotency checks — duplicates are rare.

### 2.2 Declined Payment

| Decline Reason           | Customer Action                      | Support Action           |
|--------------------------|--------------------------------------|--------------------------|
| Insufficient funds       | Add funds and retry                  | None required            |
| Card expired             | Update card in portal                | None required            |
| Bank blocked transaction | Contact issuing bank                 | Provide transaction ref. |
| 3D Secure failure        | Retry with OTP                       | Check gateway logs       |
| Daily limit exceeded     | Try next day or use alternate method | None required            |

### 2.3 Payment Success but Service Not Activated

- Wait 15 minutes — activation can take up to 15 min post-payment.
- Check spam folder for the activation email.
- Log out and log back in to the portal.
- If issue persists after 1 hour: contact support with payment transaction ID.
- Support will manually verify payment and activate the service within 2 hours.

## 2.4 Incorrect Invoice Amount

If the invoice amount does not match the expected charge (e.g., discount not applied, wrong plan billed), customers should:

- Download the invoice from Portal > Billing > Invoices.
- Compare against the plan pricing page at [novatech.io/pricing](https://novatech.io/pricing).
- Email [billing@novatech.io](mailto:billing@novatech.io) with the invoice number and the expected vs. actual amount.
- Resolution: Invoice correction or credit note issued within 3 business days.

## 3. Payment Method Management

---

### 3.1 Updating Payment Method

Navigate to Portal > Settings > Payment Methods > Add New Method. Set the new method as default before the next billing cycle to ensure uninterrupted service. Old payment methods can be deleted after setting a new default.

### 3.2 Supported Payment Methods

| Method                    | Availability            | Processing Fee | Refund Supported |
|---------------------------|-------------------------|----------------|------------------|
| Visa / Mastercard Credit  | All plans               | None           | Yes              |
| Visa / Mastercard Debit   | All plans               | None           | Yes              |
| UPI (GPay, PhonePe)       | Monthly plans only      | None           | Yes              |
| Net Banking               | All plans               | None           | Yes              |
| PayPal                    | International customers | None           | Yes              |
| Bank Transfer (NEFT/RTGS) | Enterprise only         | None           | 5–7 days         |

## 4. Escalation Path for Payment Issues

---

Tier 1 — Self-service via portal (< 5 min resolution for most issues) Tier 2 — Live chat / email (response within 4 business hours) Tier 3 — Billing specialist call (scheduled within 1 business day) Tier 4 — Finance team review (complex disputes, 3–5 business days)
